

Testimonial for April Tarras –

When we took on the task of shopping around for new auto and home insurance, we were delighted to find that April was able to insure us for not only less money, but better coverage. We unfortunately experienced two events in the past couple years that required her assistance. One, after a storm we had trees and power lines down in our back yard, resulting from an extensive power outage and loss of perishables. Two, we had a sewer pipe break near the main. This resulted in extensive sewer work over the winter months. In both instances, April was with us every step of the way. I recall that at least one of our panicked calls was on a weekend and April returned our call within hours. By the time she returned our call, she had already contacted the individual who would assess the damage, and there were no delays at all. April's customer service was top notch. We have been happy to recommend her to our family and friends. It goes without saying that they have experienced the same level of quality and customer service. Thank you April!!
